Research Interests

My research lies at the intersection of software engineering (SE) and AI. I focus on (1) combining **program analysis with LLMs to address real-world problems**, e.g., **flaky tests repair** [5,6,7,13] and **SWE issue repair** [2]; (2) **synthetic data generation**, leveraging mutation testing to evaluate flakiness detection tools [8] and genetic algorithms to **benchmark LLMs** on multiple complex coding tasks with real-world difficulty [1,9]; I also study **LLM code reasoning** [4,10].

Prior research projects have equipped me with diverse skills in neurosymbolic program analysis, genetic algorithms and LLM fine-tuning, as well as software testing including flaky tests detection & repair (**accumulating to 139 patches accepted in real world**), mutation testing and test suite minimization.

My ongoing research focuses on building **agentic systems** that integrate SE knowledge and process-centric analysis of agentic systems.

Education

2022-Present **University of Illinois Urbana-Champaign (USA)**.
Ph.D. Candidate in Computer Science (Anticipated graduation: 2027 May)
Co-advisors: Reyhaneh Jabbarvand and Darko Marinov

2018–2022 **Huazhong University of Science and Technology (China)**.
B.Sc. in Computer Science

Publications

- [1] Evaluating the Generalizability of LLMs to Real-World Complexity .
(under review) **Yang Chen**, Shuyang Liu, and Reyhaneh Jabbarvand.
- [2] Enhancing SWE Issue Repair with Regression Tests.
(under review) **Yang Chen**, Toufique Ahmed, Reyhaneh Jabbarvand, and Martin Hirzel.
- [3] Process-Centric Analysis of Agentic Software Systems.
(under review) Shuyang Liu, **Yang Chen**, Rahul Krishna, Saurabh Sinha, and Reyhaneh Jabbarvand.
- [4] ICSE 2026 Assessing Coherency and Consistency of Code Execution Reasoning by LLMs [\[PDF\]](#) .
Changshu Liu, **Yang Chen**, and Reyhaneh Jabbarvand.

Experience

- 2025 **IBM Research Scientist Intern**, IBM Research, NY.
May – Aug Manager & Mentor: [Martin Hirzel](#) and [Toufique Ahmed](#).

Selected Honors and Grants

- 2024 Ranked 2nd in the 46th ACM Student Research Competition at ICSE 2024.
2023 SIGSOFT CAPS Grants for ISSTA 2023, ICSE 2024, and ISSTA 2024.
2022 Outstanding Graduate of Class 2022, Huazhong University of Science and Technology.

Academic Service

- Reviewer: MSR 2024, TOSEM 2025.
Artifact Evaluation PC: ISSTA 2024, ISSTA 2025.
Research Track PC: MSR 2024.

Programming Skills

Python and Java.
